

Game on. Game safe.

Games aren't fun when they lag or leak your sensitive data. Gain complete visibility into the technology services that host and run your AWS gaming apps. Our cloud-native, multi-tenant, secure platform allows you to identify, contextualize and resolve issues faster, increasing your games' reliability and cybersecurity posture.

Sumo Logic enables improved security posture and increased reliability through observability for AWS gaming apps

- ✓ Ensure a great gaming experience
- ✓ Consolidate security tools and integrate threat intelligence
- ✓ Protect every part of your cloud environment
- ✓ Operationalize faster deployment cycles
- ✓ Reduce resolution time and downtime issues overall
